WHY SHOULD
ONE DO

- Annual blood test is the key component for preventing degenerative disease. By providing a comprehensive snapshot of your current state of health, blood screening can catch potential health problems in their early stages when they can be managed most effectively.

EXECUTIVE
PROFILE

- Regular tests assess the status of numerous systems in the body, blood sugar levels, liver and kidney function, immune system wellness, and optimal hormone balance. Regular testing also monitors electrolyte levels, mineral balance, and red blood cell size and number.
